Report on the **SCAPP Plus** Project

STAKEHOLDERS CONVENING

THE SCAPP+ ENGAGEMENT:

The Untapped Potential of the Community Leaders In Strengthening PHCs and Amplifying Community Voices. and Kaduna State PHC Officers Training (Social and Citizen Accountability for PHC Performance (SCAPP+) Project)

Held on 13th - 17th July, 2026 at Bafra Hotel, Kaduna State, Nigeria

Funded by:

budgIT

About BudgIT

BudgIT is a civic organisation that uses creative technology to simplify public information, stimulate a community of active citizens, and enable their right to demand accountability, institutional reforms, efficient service delivery, and an equitable society.

Country Director: Vahyala Kwaga

Strengthening Health Systems Team: Dr Biobele Davidson, Dare Oyeleke, Roseline Nyong

Creative Development: Ayotomiwa Aje

Contact: info@budgit.org +234-803-727-6668, +234-908- 333-1633
Address: 16, Harvey Road, Yaba Phase 2, Lagos State, Nigeria.

Day 1

WDC LGA ALLIANCE/LGA HEALTH SECRETARIES ENGAGEMENT

Time: 10:00 am - 4:30 pm

Arrival & Registration: 10 am

The engagement meeting started at 10:50 am with opening prayers by both Muslim and Christian clerics, followed by the National Anthem. This was followed by a brief introduction from all the participants.

Welcome Address:

The Country Director, Mr.Vahyala Kwaga, gave the welcome remark. He welcomed all the WDC Chairmen and Health Secretaries and appreciated their honouring the invitation. He underscored the strategic timing of the meeting, noting that stakeholder feedback is vital and that accountability mechanisms should incorporate non-monetary incentives.

Goodwill Messages:

Goodwill messages were delivered by the WDC State Chairman, Alhaji Jaji; the LGA Health Secretaries Chairperson, Dr Yahuza Muhammed; the JNI Representative, Mallam Nasiru Muhammed; and the CAN Representative, Rev. Daniel Kaswa.

Overview of SCEAP and SCAPP Project and Introduction of SCAPP+ Project:

Strengthening Health Systems (SHS) Team Lead, Dr. Biobele Davidson kicked off the discussion by giving a rundown of Strengthening Health System Unit projects, starting with the SCEAP project, then the SCAPP project, and now the SCAPP+ project. She highlighted the successes of the Strengthening Community Engagement and Accountability for PHC (SCEAP) project, with 75 PHCs profiled across 5 states: Kaduna, Kano, Borno, Yobe, and Gombe. The project generated 56 institutional engagements, 59 institutional responses, 204 tangible impact actions and 268 community interventions.

Social and Citizen Accountability for PHC Performance (SCAPP) project followed, with 200 PHCs profiled in Kaduna State, with the following successes recorded: improved service utilisation across 200 primary healthcare facilities, improved data ecosystem through the PHC Accountability Tracka platform (integrating facility records, government systems and citizen feedback), strengthening of capacity for 45 State led accountability mechanisms (SLAMs) and Health Sector Reform Coalition (HSRCs) through four

capacity-building sessions to improve community engagement, participation and ownership of community health interventions with sustainable, effective and efficient delivery of PHC services, among other things.

She unveiled the SCAPP+ project, stating that 50 PHCs will be profiled during the 4-6-month project. She explained that the reduction in the number of PHCs being profiled is the result of the Grant re-scoping by the Donor. She stressed that the project aims to improve primary healthcare delivery by amplifying community voices and embedding accountability directly into health system governance across 50 PHCs in Kaduna State. This aims to be done via applying a blended system that utilises a bottom-to-top approach, working through Ward Development Committees (WDC), community champions and coalitions, while simultaneously strengthening state-level institutional engagement and institutional responses to ensure community evidence translates into policy action, improved service delivery and better Maternal, Newborn and Child Health (MNCH) outcomes.

The eight (8) SCAPP+ measurable objectives were shared, which are:

1. Sustain and enhance the quality of care, service delivery and infrastructure standards in the 22 existing L2 facilities.
2. Support the transition of all 7 partially functional L1 facilities to fully functional L1 status through targeted improvements in infrastructure, staffing, equipment, governance and community oversight.
3. Upgrade of 15 functional L1 facilities to L2 status by addressing identified service delivery gaps and strengthening their capacity to meet higher operational and quality standards.
4. Number of facilities optimised in L1 and L2 categories to render quality maternal and newborn delivery services, with opportunities for optimisation through our integrated social accountability mechanism.
5. Number of citizens with a multilayered approach committed to strengthening timely institutional responsiveness to address health gaps.
6. Strengthen the capacities of LGA coordinators, WDCs, and Facility Officers-in-Charge (OICs) to effectively drive community participation, accountability and responsive health service delivery.
7. Integrated social accountability mechanisms for citizens' community and institutional engagements to prioritise strengthening community engagement, facility readiness and expanding equitable access, to improve MNCH outcomes across the Maternal and Neonatal Mortality Reduction Innovation Initiative (MAMII) LGAs.
8. Tracking broad-level health financing indicators in Kaduna, especially capital expenditure for health.

Round Table Discussion

The General Round Table Discussion commenced after, and these are the highlights and the commenters:

- It takes two to tango; The executive secretaries (political actors) must join hands with the WDC chairpersons to bring improvements to the PHCs - WDC Secretary.
- Appeal to support the WDC chairpersons through Capacity training - WDC Secretary.
- Tensions between Facility Managers and WDC Chairmen should be reduced where they exist - WDC Secretary.
- Train a few focal WDC Chairmen who will, in turn, train other chairmen - WDC Chairman, Kaduna South LGA.
- Enhance cooperation between Health secretaries, Officer in Charge and WDC Chairmen - WDC Chairman, Kaduna South LGA.
- An effective record system in PHCs is needed - WDC Chairman, Kaduna South LGA.
- Improve Security in PHCs to avoid theft - WDC Chairman, Kaduna South LGA.
- A document highlighting the roles and responsibilities of WDCs, OIC, Executive Secretaries, Chairperson and LGA Health Secretaries should be provided.
- Health Care workers not staying in the community where they are posted should be checked - Chairperson, LGA Health Secretaries.
- Sustainable plans for Field officers and Health Care workers should be made - Chairperson, LGA Health Secretaries.
- WDC chairpersons and Officers-in-Charge should meet routinely to ensure accountability - Mr Goje (Zangon Kataf)
- Domesticate WDC guidelines for Kaduna - Kauru LGA
- Institutional relations with CSO, donors, and Government during Budget cycles.

The discussion ended with Dr Biobele responding to some of the issues raised and promising that work has commenced to address them.

BudgIT's State Officer for Kaduna State, Bright Osula, trained the participants in using the Tracka platform. He shared the Tracka website: www.yourtracka.org. He informed them that projects in their locality and needs assessed in their community can be uploaded through the website.

Roseline Nyong trained the participants to use the PHC Tracka (www.phctracka.org) and on the importance of this tech tool for accountability. She demoed the PHC Tracka Portal and explained that it has two domains: one of them being the Patient/Citizen domain (which breaks down the portal's feedback collection) and a total of 5,125 PHCs profiled across Nigeria, along with 69,126 community feedback items.

Dare Oyeleke moderated the Zonal breakout roundtable session, with attendees grouped into 3 zones for deliberation. The discussion was mainly held in the Hausa language, and participants were asked to focus on 3 major themes: the needs and challenges of their zone, the strengths of their zone and areas for collaboration. One person presented for each zone.

Table 1: WDC/Health Secretary Presentations

Zone	Presenter	Strength	Needs/challenges	Areas for collaboration:
3	Mr Jolli Jatau	Presence of a high number of PHC facilities	Inadequate human resources. Water supply non-functional due to poor maintenance; Solar installation for cold rooms needed; poor supervision of facilities due to cost, as facilities are far apart.	Advocacy, Training of Advoc Health staff.
2	Dr. Mohammed Lawal	Presence of a high number of PHC facilities, Availability of solar lighting, and a large number of tertiary institutions helping service delivery.	Inadequate Ambulance (Emergency Transport System), Proliferation of quack health workers, Solar installation for cold rooms needed, Insecurity in Birnin Gwari.	Advocacy/sensitisation for vaccination, Outreach/Campaign against low child delivery in PHCs, Capacity Building for human resource.
1	Mrs Amina Saidu	Cordial relationship between WDCs, Health secretaries and officers in Charge.	Health workers relocating from their posts.	Resource mobilisation for PHCs.

Day 1 engagement concluded with a commitment from the WDC and Health secretaries to partner with BudgIT to strengthen health outcomes in Kaduna State after lunch. Pictures were taken at around 4:30 pm, with 50 WDC Chairmen and Health secretaries in attendance.

Day 2/3

Training of PHC officers across the 50 SCAPP+ PHC facilities in the 23 LGAs

Date: July 14 & 15, 2026

The PHC officers' training commenced with the rendition of the National Anthem on Day 2 of the Engagement. A brief introduction of participants was done.

Welcome Address:

Dr. Biobele Davidson welcomed all officers and stated the objectives of the training to be the following: Build the capacity of PHC Accountability Tracker (PAT) Health officers in the structure and operationalisation of the PHC structure.

Familiarisation with the PHC Tracka tool.

Strengthening the use of data and evidence to drive institutional engagement on fiscal issues and accountability for primary healthcare in Kaduna State.

Strengthening citizen and community voice and participation in PHC advocacy and accountability processes (service delivery, financing, infrastructure) in 50 communities in the 23 LGAs with PHC presence.

Improving community tracking and feedback mechanisms using the PAT with Government stakeholders and systems within LGAs, State Assemblies, SPHCDAs and broader health financing ecosystem (for example, Primary Health Care Under One Roof (PHCOUR), BHCPF, etc.).

Influencing social behaviours and institutions through an incentivised program for healthcare workers, PHC service delivery, and LGA PHC health optimisation via the PHC Facility and Workers Award Event and the LGA PHC health challenge.

She encouraged them to be attentive to the information to be shared during the two-day training, as it will be needed in the field. She added that they should contribute to all the interactive sessions.

Annex: Training Activities

- ☑ Presentation of the Minimum Standard Primary Health Care in Nigeria by Dr Biobele
- ☑ Presentation of the SCEAP and SCAPP projects and the transition to the SCAPP+ by Dr Biobele.
- ☑ Demonstration of the PHC tracka by Roseline Nyong.
- ☑ SCAPP+ project Baseline Survey using Kobotool by Roseline Nyong.
- ☑ Presentation on Kaduna State Health Financing by Oyeleke Dare.
- ☑ Needs assessment breakout sessions for participants.
- ☑ PHCs facilities/community alignment.
- ☑ Feedback/portal demonstration.

Presentation of the Minimum Standard Primary Health Care in Nigeria
Facilitator: Dr Biobele

She explained that the document is an official policy manual titled "Minimum Standards for Primary Health Care in Nigeria," published by the National Primary Health Care Development Agency (NPHCDA) under the Federal Ministry of Health. The purpose of the manual is to uniformly define the infrastructure, human resources and medical services for primary healthcare facilities across Local Government Areas (LGAs) in Nigeria to ensure standardised quality and equitable medical access. She expounded that the primary medical priorities of PHCs outlined under this framework are: Control of prominent communicable diseases (Malaria, TB, STI and HIV/AIDS), Child survival initiatives, Maternal and newborn clinical care, Public health nutrition and food education, Prevention of non-communicable diseases and Health education and community mobilisation. She later taught on the three tiers of facilities, namely the Health Post, the Primary Health Care (PHC) and the Primary Health Care Centre (PHCC) and their standards.

Presentation of the SCEAP and SCAPP projects and the transition to the SCAPP+
Facilitator: Dr Biobele

Dr Biobele Davidson reviewed the SHS Unit's progression through three key initiatives, starting with the SCEAP and SCAPP projects, which profiled over 275 primary healthcare centres (PHCs) to improve service utilisation and data integration. The new SCAPP+ project, a 4-to-6-month initiative targeting 50 Kaduna State PHCs, employs a bottom-to-top framework via WDCs to enhance community-driven accountability for improved health outcomes.

Demonstration of the PHC Tracka
Facilitator: Roseline Nyong

The demonstration highlighted the platform's capacity to function as a unified, real-time data ecosystem. It successfully integrates three distinct streams: raw primary healthcare facility records, formal government tracking systems and direct citizen feedback. Rose showcased how the app transitions community-generated evidence into actionable data dashboards. Users can track clinic supply chains, monitor facility infrastructure deficits and human reso`urces and flag operational bottlenecks instantly. She taught attendees how to navigate through the app effortlessly, and hands-on practice was done afterwards.

SCAPP+ project Baseline Survey using Kobotool
Facilitator: Roseline Nyong

Roseline Nyong conducted a training session for Primary Health Care (PHC) officers on using KoboToolBox to ensure standardised, accurate, and timely baseline data collection for SCAPP Plus. The training focused on building officers' capacity to independently navigate the platform, covering facility infrastructure, service delivery, and progress indicators, with particular emphasis on maternal and newborn health and MAMII indicators.

Officers were trained on accessing KoboToolBox, understanding the baseline questionnaire structure, and completing data entry via the Enketo web form (ee.kobotoolbox.org/x/c9WL3RG0), including offline data capture with automatic sync, draft-saving and submission of queued records. Data quality practices around accuracy, completeness and consistency were also emphasised.

Participants completed mock/practice entries and are now equipped to begin live baseline data collection using the Enketo link, with supervisors monitoring submissions through the KoboToolBox project dashboard.

Presentation on Kaduna State Health Financing
Facilitator: Oyeleke Dare

The training was focused on the FGN Health Budget in 2026, which stands at N2.51tn and Health allocations to Kaduna State in the FGN 2026 budget, clearly highlighting the 51 ongoing capital health projects earmarked for Kaduna State within the Federal Government of Nigeria (FGN) 2026 Approved Budget, balancing overarching clinical objectives against localised constituency execution. It also reviewed the Kaduna State Health Budget for 2026, which stands at N144.6bn, showing that Kaduna State's 2026 health budget reflects a historic 91.07% year-on-year growth, climbing to N144.6bn from 2025's N75.6bn.

This funding expansion raises the health sector's share of the total state budget from 9.57% to 14.66%. The state is aggressively prioritising capital expenditure, which commands N109.10bn (75.47%) of the 2026 health envelope. It also focused on the health budget performance for 2025, which was at 42.56%. Attendees were also trained on LGA Health financing, with all LGA health financing data displayed.

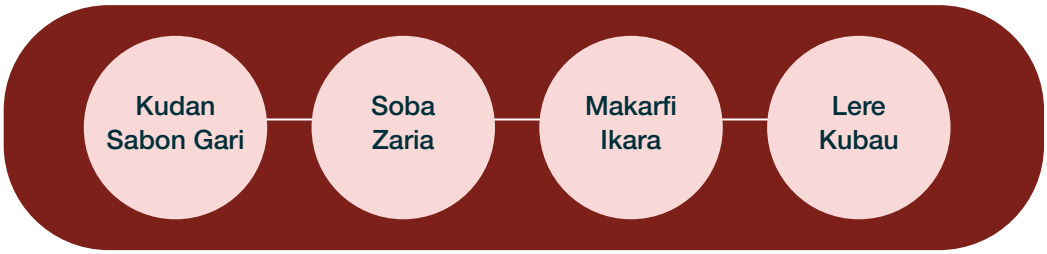

Finally, action plans were discussed, which included:
Verification of Location Mapping: Map constituency codes (e.g., ERGP25237474 for Jagindi Tasha PHC Upgrade - N63m) directly to the corresponding political ward;

Engaging Local Committees: Share the earmarked financial breakdowns with the relevant WDCs so they know the exact values approved;

Auditing of Medical Supplies: Track standard multi-constituency equipment drops. For instance, ensure the N28m allocations across Kaduna North, Kaduna South, Soba, Ikara and Lere are evaluated for actual physical delivery of tools rather than paper distribution; and

Logging Progress Online: Upload geo-tagged photos and local citizen reviews directly onto the PHC tracka web to match budget allocations against physical project execution.

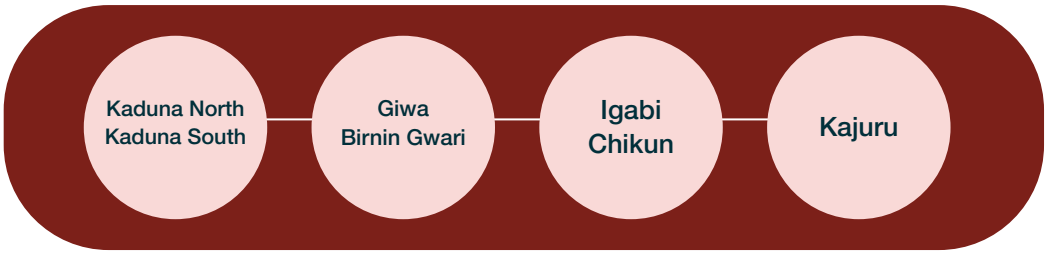

Participants' breakout session: Zone 1

Issues	Recommendation	Stakeholders
Cultural background and behaviours/religious belief	Sensitisation, outreaches, creating awareness	State Medical Officers(SMo)
Attitude of health workers	Monitoring and evaluation, checks and balances, supervision	The health facility in-charges
Shortage of infrastructures and equipment	Provision of infrastructure by the government through advocacy	The ward development committee
Shortage of workforce	Deployment of staff, advocacy to the WDC	
Poor knowledge from the community	Sensitisation, community awareness	The community-based organisation
Poor referral system	Strengthening effective referral system	Local government engagers
Insecurity	Advocacy to the WDC for provision of local security	The religious leaders
Inaccessibility to health care	Advocacy for provision of a good transport system	Ward focal persons

Swan
Swan

Participants' breakout session: Zone 2

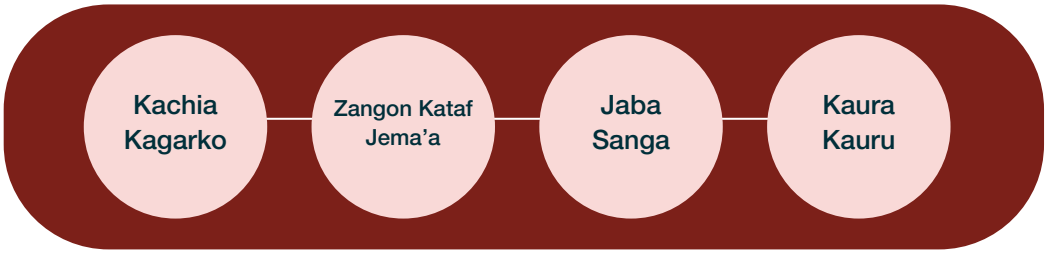

Issues	Recommendation	Stakeholders
Poor or low community engagement	Advocacy/sensitizations	WDC, Village Heads, traditional and religious leaders, PHC Staff
Institutional relationship gaps	Sensitization/advocacy	PHC Management, LGA Health Department, State PHC Board
Personnel gap at the PHC level (staff shortage)	Awareness/advocacy	Government Officials, Community Leaders, Civil Society Organisations and NGO's
Denial of access to information for improving health care at the PHC level	Advocacy	Community Health Workers, Health Educators, PHC Staff, Media, Religious Leaders
Need for more Skills and Training for health workers	Advocacy/community engagement	Ministry of Health, Training Institutions, NGO's, Professional Associations
Shortage of basic Infrastructure and Medical needs	Advocacy, sensitisation & community engagement	Government, LGA Council, Community Leaders
Insecurity issues	Community engagement	Security agencies, Community leaders, Local Government, PHC Management
Water and Sanitation	Sensitisation, awareness & advocacy	WDC, In-charges and Health Secretary, SMO, LIO Health Councillors
Diversion of PHC inventory and Drugs	Sensitisation and advocacy	WDCs, Health Secretary, community Leaders
Non-care of the community on the activities of PHC around	Community Engagement, sensitisation for feedback, FGD and Town Hall	WDCs, Community/ religious representatives, CBOs, SMO, Youth and women groups.

Social and Citizen Accountability for PHC Performance (SCAPP) Plus Project

Participants' breakout session: Zone 3

Issues	Recommendation	Stakeholders
Accessibility to health facilities	Improve synergy and communication among the facility in-charge, WDC, and community leaders to clear the road when needed and move facilities to a closer location when necessary.	Traditional Leaders
Communication gap and low synergy between WDC and facility In-charge	Improve synergy and communication between facilities In-charge, WDC, and community leaders.	Religious leaders
Low patronage due to health personnel's attitude	Improve synergy and communication between facilities In-charge, WDC and community leaders.	Women leaders Youth leaders
Low availability of drugs and transparency on usage	Advocacy and sensitisation of citizens on PHC services and other health-related services. Encourage community ownership and tracking of health facilities and services.	PHC In-charge WDC chairman
Network/Energy for data collation	Getting a preferred network provider or writing on paper and updating upon getting a stable network	LGA council Health Secretary

Day 4

MEETING WITH THE HEALTH STAKEHOLDERS

Venue: Kaduna State Secretariat
Date: July 17, 2026

Engagement with Health Stakeholders in Kaduna State Ministry of Health:

Dr Biobele Davidson (BudgIT), Dr Anthony Shamang (Gates Foundation Consultant, Kaduna State) and Mr Bright Osula (Kaduna State Officer, BudgIT).

Dr Abubakr Idris Sadiq (Dir. Public Health), Hajiya Umma Kaltume Ahmed (Hon. Commissioner of Health), Dr Biobele D. Davidson (Strengthening Healthcare Systems Lead-BudgIT), Mr Bright Osula (State Officer - BudgIT), Ms Roseline Nyong (SHS Officer - BudgIT) and Mr Dare Oyeleke (SHS Officer - BudgIT).

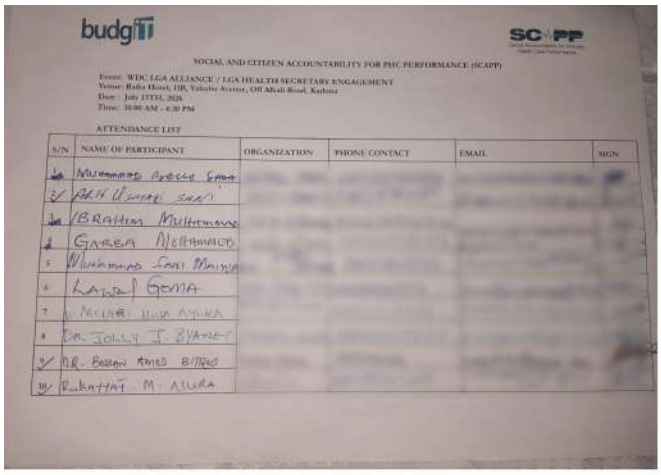

Dr Abubakr Idris Sadiq (Dir. Public Health), Hajiya Umma Kaltume Ahmed (Hon. Commissioner of Health), Dr Biobele D. Davidson (Strengthening Healthcare Systems Lead-BudgIT), Mr Bright Osula (State Officer - BudgIT), Ms Roseline Nyong (SHS Officer - BudgIT) and Mr Dare Oyeleke (SHS Officer - BudgIT).

The team led by Dr. Biobele Davidson paid a visit to the Ministry of Health, Kaduna State, to formally hand over the PHC project update report and engage them on the PHC facilities spotlighted in the document. The team first met with the Gates Foundation Representative in the Ministry, Dr Anthony Shamang, who welcomed and acknowledged the work BudgIT is doing. He was updated on the progress of the SCAPP project and the transition to SCAPP+ projects. The PHC project update document was also presented to him, and pictures were taken.

The team then headed straight to the Commissioner's office, where they were given a warm welcome. The Commissioner, Hajiya Umma Kaltume Ahmed, was briefed on BudgIT's SCAPP project and its impact on the health sector in Kaduna State, specifically regarding the 200 PHCs being profiled. She was updated on the new SCAPP+ project and its objectives. In response, she appreciated the organisation for supporting the Kaduna State Government in achieving her deliverables in the health sector. She added that BudgIT's advocacy efforts are yielding positive results in the state. She encouraged BudgIT to participate more in stakeholder engagements to produce optimal health service delivery in Kaduna State. The PHC project Update report was then presented to her, and the ten facilities spotlighted in the state were discussed. She thanked BudgIT for the visit, and pictures were taken after.

Afterwards, the Team met with the SWAp Desk officer to discuss our SCAPP+, State engagement and BudgIT's Kaduna State MAMII Pilot program.
